

*Modern dining culture in the hotel and restaurant sector*

**BAUSCHER presents new items by *Purity* and *Playground***

Weiden, Germany, February 2018. Nominated for the 2016 German Design Award, the *Purity* collection has continued to captivate the international luxury hotel and restaurant sector with its merging of design and functionality.

The multi-purpose porcelain pieces from the *Purity* collection are particularly well-suited to a buffet, where they can showcase the wide array of current food trends. BAUSCHER will present how well *Purity* allows freedom of culinary imagination in this context at the Inter-gastra, Ambiente and Internorga trade shows this spring.

**For creative freedom at the buffet: *Purity Square***

Modern buffets focus increasingly on fresh, finely-portioned offerings. This is where the new square platters and plates by *Purity Square* come into play, enabling an appetizing presentation of pre-portioned dishes even in the tightest space. Just as crucial for every buffet are large platters from which the guests can serve themselves – here too, *Purity Square* offers a large selection. A special feature is the matching lateral dimensions, which enable versatile combinations and arrangements.

Other items from the *Purity* collection are also perfectly suited to the requirements at the buffet. The bowls and dishes from *Purity Classic* are the perfect solution for presenting the wide range of buffet delicacies. Furthermore, with the elegant round plates and oval platters by *Purity Coup*, BAUSCHER provides an interesting alternative to the classic rimmed range. Their minimalist design is given an exquisitely delicate touch through the fineness of the innovative Noble China material.

**Invitation to combine to your heart's desire: *Playground***

Based loosely on the principle of mix and match, the items from the *Purity* collection can also be combined with the many products from the *Playground* 'distributed by BAUSCHER' trend range. Exceptional visual effects and surprising table settings can be created, as *Playground* steals the show with the use of creative materials such as wood, leather, slate, marble, glass and metal. The warm appeal of the new LOFT wooden

presentation boards goes perfectly with the elegant BoneWhite hue by *Purity*, for example – and not just on the breakfast buffet. Attractive material contrasts and individually-tailored food presentations are also created when combined with the wooden inserts and menag-es by *Ananti*, which are made to fit with *Purity Square*.

Taking the limelight with thermal qualities, the new Amuse bowls made from temperature-resistant borosilicate glass are perfect for breakfast cereals, appetizers, small soups or dessert creations, and are especially practical on the buffet. Dishes can also be presented vertically with the small glass bowls as they can be stacked simply and securely. A Far East-inspired highlight of the current *Playground* range are the black *Sketch* platters made from shimmering matt ceramic in three different sizes. With their unusual aesthetics, they are reminiscent of Japanese calligraphy and provide a unique, high-contrast backdrop for fish and seafood creations, for example.

### **Stylish *Purity* patterns, from the noble to the oriental**

The *Purity* products come in many attractive patterns. BAUSCHER is currently expanding the successful *Pearls* pattern (previous variants *Dark* and *Light*) with the new *Pearls Metallic* variant. In its *Gold* and *Copper* versions, this fits perfectly with a wide variety of gastronomic concepts and has an unassuming, warm elegance that allows for innovative and surprising food presentations. In addition to the visual appeal with its fine shine, the tactile properties of *Pearls* also impress as the pattern is not only eye-catching, but you can really feel it too.

Patterns with motifs and ornaments borrowed from folklore are also gaining in popularity. The new *Fine Ornaments* patterns on *Purity Square* reflect this: four patterns with delicately transposed ornamentation in shades of blue and terracotta evoke a Mediterranean atmosphere. At the same time, *Fine Ornaments* provides for interesting clashes of style in classic flying buffets and offers a modern setting for moments of culinary delight through its all-over graphic appeal.

The two new patterns *Natural* and *Soft Gray* represent a subtly-colored alternative to the classic BoneWhite. The structured surfaces on *Purity Coup* and *Purity Square* are reminiscent of fine-grained wood or airy silk and therefore radiate a timeless elegance.
