

For Internorga 2011: New pieces for the presentation of hot drinks and snack food

Bauscher: Expansion of the *Enjoy* collection

Weiden, Germany, January 2011. Creative and innovative porcelain ideas for hotel business and gastronomy, for professional catering and the hospital and nursing/care sector. Bauscher Weiden, a byword for the finely-laid table, delights once again at this year's Internorga with extraordinary design and innovation. Highlights include various new pieces from the *Enjoy* collection, which was introduced last year, for the presentation of hot drinks and snack food. They harmonize with the other pieces from *Enjoy* and combine perfectly with other collections.

At their stand, Bauscher will also provide a first look at a new collection which gives restaurateurs more options for stylishly presenting finger food and flying buffets to their guests.
